

Team 6

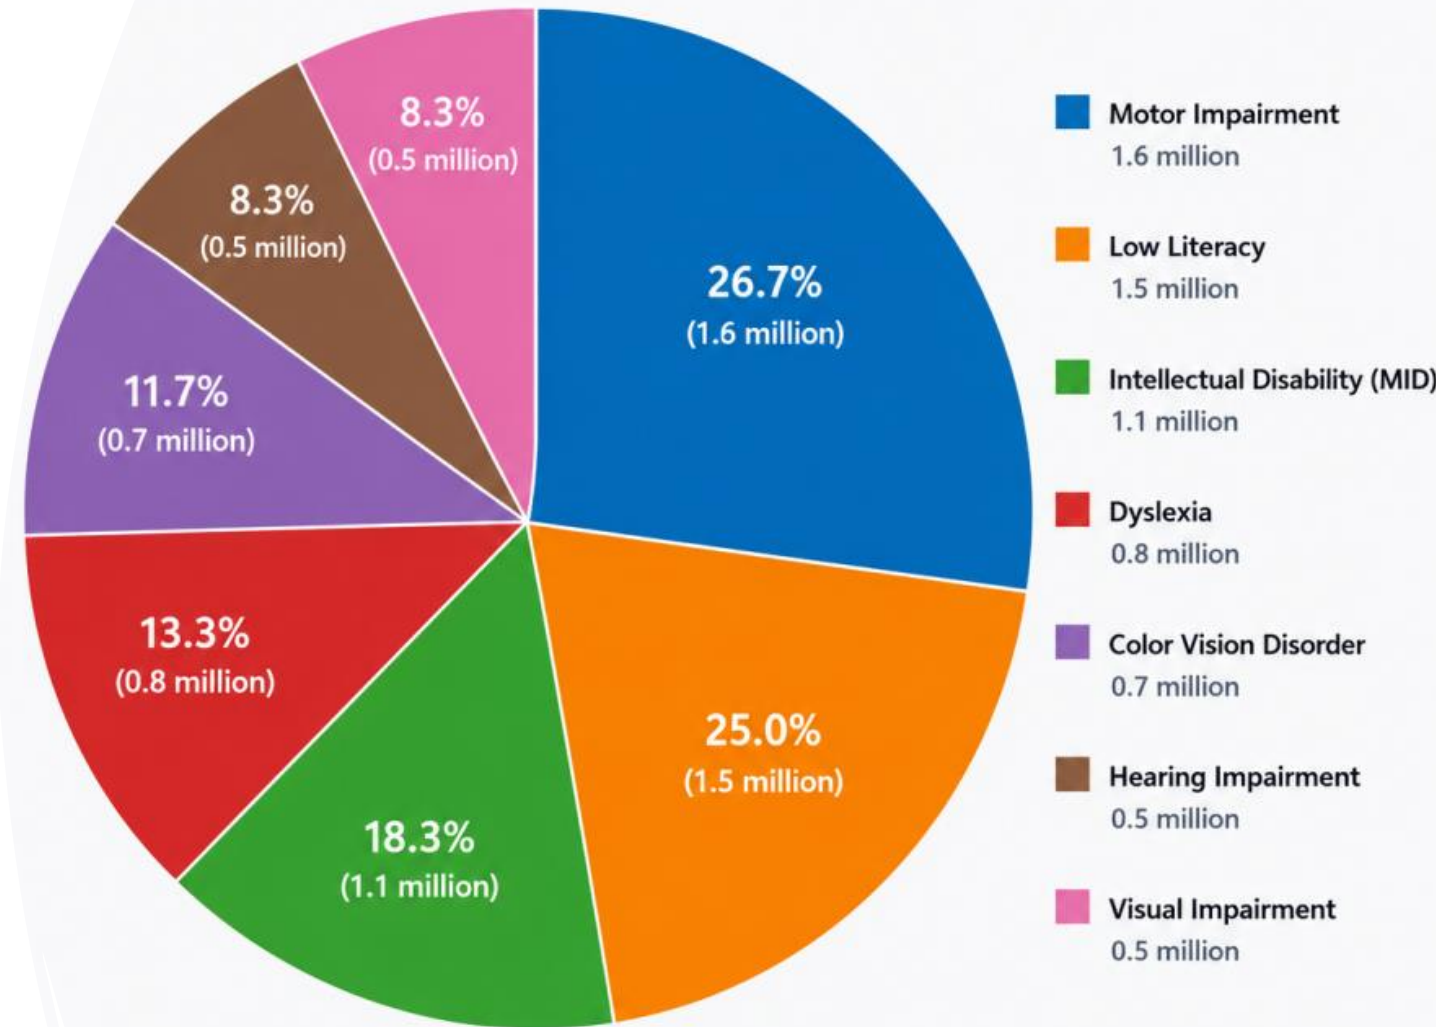

Roes, Naimi, Shaiza, Lars

Our problem

- 3 million people in the Netherlands live with a disability
- Many more face dyslexia or low literacy challenges
- Accessibility issues often go unnoticed
- Organizations need an easy way to find and fix them

People with Disabilities in the Netherlands

Total: 3 million people

In total: 3 million people in the Netherlands

Some people have multiple disabilities.

Our amazing solution

-
- An accessibility checker
 - Direct feedback
 - Easy to understand

The project progress

- Website with two fully functional checkers
- 13 accessibility rules for ppt
- 6 core rules for pdf

```
def _check_slide_titles(self, slide, slide_num: int) -> List[Finding]:
    title = slide.shapes.title
    if not title or not title.text.strip():
        return [Finding(
            severity="critical",
            rule_id="SLIDE_TITLE",
            wcag_criterion="2.4.6 Headings and Labels",
            message=f"Slide {slide_num} has no title",
            slide_number=slide_num,
            location=f"Slide {slide_num}",
            fix_hint="Add a title placeholder or text box as the first element."
        )]
    return []
```

But, who are we?

- Very small Team
- Majority Women
- All second years
- Positive

Accessibility Dashboard

Step 1: Upload the file

PowerPoint (.pptx) or PDF (.pdf)

and kiezen

Geen bestand gekozen

Step 2: Start the check

Check PowerPoint

The best part!

Check PDF

Step 3: Results

waiting to start the check...

Now we will see our application in action...
